Subject: Research proposal submission

In this folder you will find my submission for my research paper. I will be doing an in-depth analysis of a software framework called “Thrift”. My paper will be highly technical, and be targeted directly at an experienced, professional software engineer who is already familiar with the relevant concepts.

I chose this topic because it is highly characteristic of the types of research I need to do in my field, and it is something that interest me and that I have wanted to learn more about.

You will find both my final version of my proposal, as well as a copy reviewed by one of my co-workers, with comments in-line.
